Level Up Leadership recap of the four major points:

History & the World Today

This is to help give us a better picture on why certain things work the way they do, the changes that were made and how we can move on and improve from these lessons learned in history.

Your People

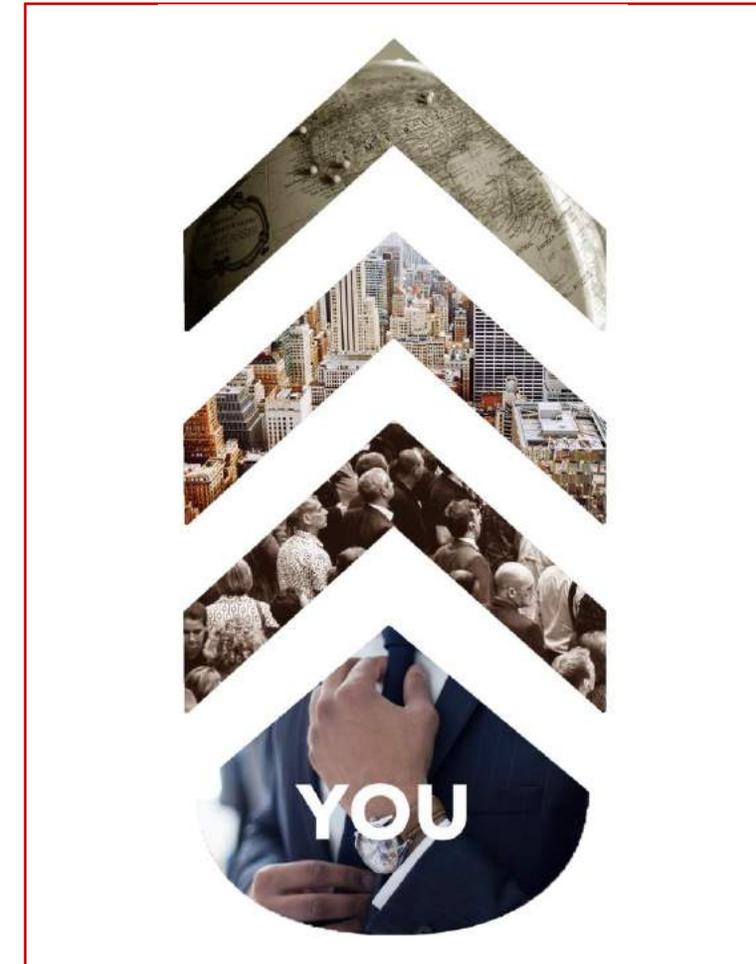

This is a more personal level of leadership connection. It's about how we can influence our people who work directly with us. It's mostly about communication and succession.

Organization

This is focused on the organizational structures and what a person can encounter with regards to leadership in the organization.

You

Francis Kong always says that leadership begins with you, but it's not about you. That's why we have to develop ourselves first, before we lead others.
